SUMMARY

I'm a Full stack Web Developer and Application Developer with more than 3 years of professional experience. In my works I always try to combine aesthetic with functional aspects, looking for the right balance to communicate without annoying. What makes a great website? Here's my opinion: a successful website should be attractive but easy to read. A fascinating message, together with an immediate understanding. Original content and easily traceable information: that's my recipe. I have always been studying new techniques to improve my knowledge, face new challenges and do best in my Creation.
