Lakshmikant Tyagi

About me I'm a full stack web developer with an emphasis on performance, best practices, testing in order to create a better applications. I like to involve in everything from the overall direction of a project, to design, user experience, and the actual implementation. I enjoy working on open source projects as it helps to give back to the community. I'm passionate about crafting great user experiences and this influences all of my decisions as I work on a project.
